

Jennifer and Rebecca,

As promised, here are the points we agreed on at last night's meeting. As you know, our objective with this proposal is for the city and college can resolve this issue without literally walling each other off!!

- Set aside a place where smoking can occur on campus grounds nearby the Princeton exit, perhaps to the West of Parking Lot 9. (We understand that 60% of classes are offered in this part of the campus, so students do not have time to walk to Manake, 355 or other smoking areas suggested by the college.
- Provide security personnel in the vicinity of the Princeton exit facility

I also copied Ben Nicholson, Montgomery County Professor of Mathematics who will be meeting with Judy Ackerman today. Ben, would you please let us know what the disposition of your meeting with Judy is, and especially any suggestions you have about how the city/RBAC/neighbors can constructively proceed to ameliorate this issue.

Thank you all for your help on this important and urgent issue.

Cheers,

Nancy
